

COFFEE MACHINE SAMPLE

Subject: Revolutionise Your Brew: 30 Days of Cool, Convenient Coffee

Dear Coffee Enthusiast,

You know there's ice at the store, but by the time you're served and return home, it's melted like ice cream in the sahara.

And you also forgot to pick up another capsule box for the week ahead.

Sound familiar?

Imagine never running out of ice or capsules again.

Imagine a perfectly chilled, flavourful brew in just 5 minutes, without ANY prep OR delay.

Sound too good to be true?

Introducing the groundbreaking, eco-friendly brewing system that's changing the game.

Crowned as the MOST anticipated invention at 2024 London's coffee festival, it is the vanguard of innovation in the industry.

- NO more ice top-ups, pods, or special storage required.
- NO need for refrigeration or hot water.
- NO dilution or bitter flavours.

How?

Our patented Snowdrop solid-state auto-chilling and cyclone recirculation technology delivers a highly concentrated 32°F chilled beverage of your choice in exactly 5 minutes.

With this scientifically backed brewing system just developed, common refrigeration for such a necessity is no longer needed with thermoelectric semiconductor design.

All from the comfort of your home.

Elevate your coffee experience with a sophisticated, smooth-tasting pick-me-up that outperforms any other brew.

Ready to transform your morning routine?
